Revision **247** - Directory Listing
Modified *Wed Sep 01 15:48:50 2021 New Zealand Standard Time* (3 days, 20 hours ago) by *130434*

```
 I finished the evidence log. I might make a few tweaks here and there (for both th
e log and c# program) to make it look nicer and ensure everything is there.
```

Revision **246** - Directory Listing
Modified *Tue Aug 31 12:18:55 2021 New Zealand Standard Time* (5 days ago) by *130434*

```
Finished my log, just need to read over it one more time. I have to just double che
ck if my C# code follows on the conventions. My database is finished.
```

Revision **245** - Directory Listing
Modified *Mon Aug 23 12:16:14 2021 New Zealand Standard Time* (13 days ago) by *130434*

```
Finished the C# Program with comments and the final bugs. There shouldn't be any bu
gs. Still got to do testing (user, code validation, functionality). Then I have to
reflect on testing and trialling.
```

Revision **244** - Directory Listing
Modified *Fri Aug 20 12:16:21 2021 New Zealand Standard Time* (2 weeks, 2 days ago) by *130434*

```
Almost finished the C# coding. Need to a little more testing, add bits and pieces a
nd comments :(. I also need to keep updating my log togo with the changes I made in
my code.
```

Revision **243** - Directory Listing
Modified *Tue Aug 17 17:11:39 2021 New Zealand Standard Time* (2 weeks, 4 days ago) by *130434*

```
I've edited my xaml file and c# code so that it fits with the conventions given by
the school. I've got all of my code down, just need to think of alternative's ways
to do some parts, of the view ticket screen. I've decided to use 1 method for the 2
logout buttons in viewticket and reportissue. Also I've changed all my var to MySql
Command type as this specifies it better.
```

Revision **242** - Directory Listing
Modified *Mon Aug 16 20:02:44 2021 New Zealand Standard Time* (2 weeks, 5 days ago) by *130434*

Revision **241** - Directory Listing
Modified *Mon Aug 16 20:00:39 2021 New Zealand Standard Time* (2 weeks, 5 days ago)
by *130434*

```
Updated my database model to fit with the changes I made.
```

Revision **240** - Directory Listing
Modified *Mon Aug 16 19:56:24 2021 New Zealand Standard Time* (2 weeks, 5 days ago)
by *130434*

```
I edited my c# code to fit the changes made in the database. Lastly, I've checked o
ver the first two components of my log to ensure that they are accurate and that it
is complete.
```

Revision **239** - Directory Listing
Modified *Sat Aug 14 17:45:21 2021 New Zealand Standard Time* (3 weeks ago)
by *130434*

```
Continued working on my C# program. I've got most of it done. There's a small bug w
hen filling the TicketDataGrid, an extra row shows, which can crash the progam. I s
till have to trial and test most component. I've got the bulk of the program done,
except for the apply change button, which I still have to code.
```

Revision **238** - Directory Listing
Modified *Wed Aug 11 11:05:57 2021 New Zealand Standard Time* (3 weeks, 4 days ago)
by *130434*

```
I troubleshooted the ReportIssueButton that had a few bugs in it here and there. Fu
rthermore, I checked the database. I figured the description is not null, so when s
hown it will be empty in the issue tab. Hence I've decided to go back to using a tr
igger for the description in the detail table.
```

Revision **237** - Directory Listing
Modified *Mon Aug 09 10:00:19 2021 New Zealand Standard Time* (3 weeks, 6 days ago)
by *130434*

```
I tested the best way to store idUser. Turns out I want it both, so it's clear when
logging in that it is the right user and this way it's user to access across multip
le functions.
```

Then I moved onto the report issue button. Finished the code haven't tested it, i.e don't if it works. Note: Last week I had minimal commitments due to being sick Tues day onwards.

Revision **236** - Directory Listing
Modified *Mon Aug 02 11:05:36 2021 New Zealand Standard Time* (4 weeks, 6 days ago) by *130434*

Started working on C# code. Finished the relevant implication for the database. Jus t coded in the login button going to the corresponding tab. Need to figure out how to keep the iduser so that I can easily insert it into the ticket table.

Revision **235** - Directory Listing
Modified *Wed Jul 28 15:19:52 2021 New Zealand Standard Time* (5 weeks, 3 days ago) by *130434*

I worked on ensuring that the database is complete. I finished the bug with not pro perly updating after changing the password. Just need to have a 'user' do another t horough test to ensure there are no other bugs in the database.

Revision **234** - Directory Listing
Modified *Mon Jul 26 12:38:42 2021 New Zealand Standard Time* (5 weeks, 5 days ago) by *130434*

I've worked on testing my MySQL database. There were a few bugs, like the END IF st atement was in the wrong place in the trigger. And I still need to add a trigger fo r BEFORE UPDATE since if the password is updated, the hashed password doesn't chang ed, which was discovered through user-testing.

Revision **233** - Directory Listing
Modified *Fri Jul 09 11:13:54 2021 New Zealand Standard Time* (8 weeks, 2 days ago) by *130434*

I've updated the database for user and detail. I've added users into the database s o I can do more testing. I've hashed the password and then delete the original pass word (set to null) so that I can't be seen. Lastly I've added a default expression to the description column in the detail table, instead of a trigger, so it's easier to follow the database.

Revision **232** - Directory Listing
Modified *Tue Jul 06 14:53:28 2021 New Zealand Standard Time* (2 months ago) by *130434*

```
I've finished setting up the login screens - including the comboboxes along with th
e checkbox. The checkbox was only working one way i.e. wasn't working when unchecke
d so I had to add that into the xaml code. Furthermore, I've changed the position o
f the checkbox, and hence login button after getting feedback from end-users. Moreo
ver, upon mroe feedback, I've moved the content of report issue tab around so that
it's less cramped. Also I've had to increase the window size due to the desginer wi
ndow being bigger than hte output window.
```

Revision **230** - Directory Listing
Modified *Wed Jun 30 18:03:49 2021 New Zealand Standard Time* (2 months ago)
by *130434*

```
Just finished setting up the layout of the 3 screens. Just need to add in the usera
mes of the admins into the comboboxes and code the view password checkbox.
```

Revision **229** - Directory Listing
Modified *Thu Jun 24 12:59:20 2021 New Zealand Standard Time* (2 months, 1 week ago)
by *130434*

```
Submitting visual studio files.
```

Revision **228** - Directory Listing
Modified *Thu Jun 24 12:58:14 2021 New Zealand Standard Time* (2 months, 1 week ago)
by *130434*

```
I've started working on visual studio. I've almost set up the login screen, current
ly busy with setting the other 2 screens up. All I've to do is add in the view/new
assigned staff usernames using c# and the checkbox for viewing password in c#.
```

Revision **227** - Directory Listing
Modified *Wed Jun 23 10:54:28 2021 New Zealand Standard Time* (2 months, 1 week ago)
by *130434*

Revision **226** - Directory Listing
Modified *Wed Jun 23 10:54:02 2021 New Zealand Standard Time* (2 months, 1 week ago)
by *130434*

```
I continued working on planning mostly. I've finished showing queries that I will u
se for SQL and I've elaborated on some of my descriptions.
```

Revision **224** -
Modified *Tue Jun 22 10:01:12 2021 New Zealand Standard Time* (2 months, 2 weeks ago) by *130434*

```
I added the excel database sample because I didn't title the columns properly e.g.
all bold, no italics for foreign keys.

I finished the model now inputting the sql queries in planning, then decomposing.
```

Revision **222** -
Added *Fri Jun 18 15:12:17 2021 New Zealand Standard Time* (2 months, 2 weeks ago) by *130434*

```
I finished on my sample data table in excel. Starting working on my sql model.
```

Revision **221** -
Modified *Thu Jun 17 13:37:57 2021 New Zealand Standard Time* (2 months, 2 weeks ago) by *130434*

```
continued working on planning. I worked on sample data and ensuring it meets the st
andard. Still to complete. Have finished layout.
```

Revision **220** -
Modified *Wed Jun 16 12:46:46 2021 New Zealand Standard Time* (2 months, 2 weeks ago) by *130434*

```
3.3/3.8 LOG STARTED, FINSIHED THE FIRST TWO LAYOUTS OF THE SCREEN.
```
